To,
National Stock Exchange of India Limited
Exchange Plaza, Plot No. C/1, G Block
Bandra-Kurla Complex, Bandra (E)
Mumbai-400051, Maharashtra
NSE Code: SERVOTECH

Sub.: Disclosure pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 for product launch

Dear Sir/Madam,

We write with reference to the captioned subject, in this connection we are delighted to inform that the Company has launched new product named "**Servotech Oxygen Concentrator**".

Servotech Oxygen Concentrator is a device that concentrates the oxygen from a gas supply (typically ambient air) by selectively removing nitrogen to supply an oxygen-enriched product gas stream for use by people requiring medical oxygen due to low oxygen levels in their blood. Thus, it is a blessing for people suffering from lack of Oxygen during this Covid pandemic.

Please find enclosed herewith the press release for launch of the aforesaid product.

Kindly take the same on your record.

Thanking you,

Yours Faithfully,

For and on behalf of
Servotech Power Systems Limited

Raman Bhatia
Managing Director

PRESS RELEASE

SERVOTECH OXYGEN CONCENTRATOR

Servotech is a leading manufacturer of **LED lights and Solar Products** and has supplied products to our prestigious clients in India such as IOCL, BPCL and several District State Agencies, managed by MNRE. During the current Covid-19 pandemic situation, Servotech took the initiative and launched various **UVC products like UVC Disinfectant Lamp, Handheld device and Robotruck**, which are used for sanitization of homes, office, hotels, restaurants and industries to support entire human community in carrying out its economic activity in a safe manner. Amidst the current pandemic situation, UV-C technology helps us to fight against the virus and save many lives. It has a long proven history of killing of the viruses, bacteria and pathogens present in the environment by destroying their DNA within seconds, without addition of chemicals, and harmful side effects.

The German Federal Ministry for Economic Cooperation and Development (“**BMZ**”) supports the initiatives by privately owned companies that mitigate the economic as well as the health-related impact of the corona pandemic in developing or emerging countries. To effectively counter the rapidly growing threat of COVID-19, the focus lies on supporting measures that are highly effective and implementable. **BMZ has signed one such project** through its development co-operation agency–GIZ **with Servotech Power Systems Limited** under the Development Partnerships with the Private Sector (“DPP”), also known as Public Private Partnerships (“PPP”). The project aims at combating COVID 19 virus through improved disinfection measures using Far-UVC technology. **The celebration of this collaboration was arranged at our factory premise situated at Kundli, Sonipat, the German Ambassador to India visited our factory and inaugurated the project.**

In addition to our wide range of UVC products and in order to extend all possible help to our countrymen and world at large we have come up with our new product named **Oxygen Concentrator**. As we all know, that the second wave of Covid-19 is hitting the lungs enormously thereby decreasing the oxygen levels, thereby making oxygen critical element for survival. Oxygen concentrator is a device that caters the need of oxygen and shall act as catalyst in human survival.

About oxygen Concentrator:

10LPM Oxygen Concentrator OX-10A

> Specifications

Flow settings	2-10LPM
Oxygen Concentration	2~9 LPM 93%±3% 10LPM 90%±3%
Output pressure	12.5 psi (85 kpa)
Sound Level	≤50dBA
Dimensions L*W*H(mm)	368*342*572
Weight	19.5kg
Input Voltage	220V/115V
Input Frequency	50Hz/60Hz
Average power consumption	650W (Average)
Alarm Type	Power failure alarm, Lower purity alarm(optional)
OPI (oxygen percentage indicator) alarm levels(Optional)	Low oxygen: 82%, very low oxygen: 72%
Operating temperature	50°F to 95°F (10°C to 35°C)
Operating humidity	Up to 95% relative humidity
Operating altitude	Up to 12,000ft (3657 m)
Storage/transport humidity	10% to 100% up to 95% relative humidity
Storage temperature	-104°F to 158°F (40°C to 70°C)

> Features

- Stable performance, running 20000 hours without stop
- Nebulizer function(optional)
- Low oxygen alarm(optional)
- Medical grade for oxygen therapy

An oxygen concentrator is a device that concentrates the oxygen from a gas supply (typically ambient air) by selectively removing nitrogen to supply an oxygen-enriched product gas stream for use by people requiring medical oxygen due to low oxygen levels in their blood. Thus, it is a blessing for people suffering from lack of Oxygen during this Covid pandemic.

It is a portable and cost-effective device widely used in hospitals. One of the major issues that COVID-19 patients start facing is the inability to breathe properly. Therefore, oxygen concentrators can be helpful in providing best possible oxygen supportive care. A majority of the cases that are not very severe and do not require the help of ventilator support can be treated by the breathing therapy facilitated by oxygen concentrator. And, with the help of this medical device, a COVID-19 infected patient can take his/her oxygen therapy from the safety and comfort of their homes. Some other benefits of Oxygen Concentrators include improved physical exercise tolerance, improved quality of sleep, and enhanced mental alertness.

About Servotech:

Servotech Power Systems Limited was in the business of manufacturing and installation of the Solar products and the industrial LED lights during the initial years and is well known in the field of Power and back-up industry. The Company manufactures a wide range of environment friendly products

Servotech Power Systems Limited

namely LED tube light, street light, flood light, canopy light, panel lights, bay lights, yard lights and solar products such as home lights, solar street lights, solar power plant/panel, solar pumping system and lithium batteries.
