NSE Symbol: SERVOTECH

Sub.: Disclosure pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

Dear Sir,

We write with furtherance to our intimations submitted intimating the introduction of our new product "Servotech Oxygen Concentrator". With the growing pandemic and upcoming stress of 3rd wave of Covid-19 in India, Servotech Power System Limited ("SPSL") and Indian Institute of Science Education and Research, ("IISERB"), Bhopal have agreed on a programme to evolve the complete technical specification for OC rated at 5/10 lpm of Oxygen flow at near atmospheric conditions and to help sourcing of the components and associated testing to indigenize the manufacturing of OC within India.

Please consider the aforesaid as relevant disclosure required pursuant to Listing Obligations and Disclosure Requirements) Regulations, 2015.

Kindly take the above information on record and oblige.

Thanking You,

FOR SERVOTECH POWER SYSTEMS LIMITED

INDEGINEOUS MANUFACTURING OF OXYGEN CONCENTRATORS IN COLLABRATION WITH INDIAN INSTITUTE OF SCIENCE EDUCATION AND RESEARCH, BHOPAL “(IISERB)”

Servotech is a leading manufacturer of LED lights and Solar Products and has supplied products to our prestigious clients in India such as IOCL, BPCL and several District State Agencies, managed by MNRE.

During the first wave of Covid-19 pandemic, Servotech took the initiative and launched various UVC products like UVC Disinfectant Lamp, Handheld device and Robotruck, which are used for sanitization of homes, office, hotels, & industries to support entire human community in carrying out its economic activity in a safe manner. In this current second wave Servotech, in its continuous endeavor to extend all possible help to its countrymen, introduced Oxygen Concentrators to serve the affected people. With continuous surge in Covid-19 cases and growing oxygen inadequacy this year, company resolved to launch Oxygen Concentrators to help more and more people having access to it.

With the growing pandemic and upcoming stress of 3rd wave of Covid-19 in India, **Servotech Power System Limited (“SPSL”)** and **Indian Institute of Science Education and Research, Bhopal “(IISERB)”** have agreed on a program to evolve the complete technical specification for OC rated at 5/10 lpm of Oxygen flow at near atmospheric conditions and to help sourcing **of the components and associated testing to indigenize the manufacturing of OC within India**. In this regard SPSL had already established tie-up with IIT Jammu for the project of establishing a manufacturing facility of oxygen concentrators in its factory. Now this project with IISERB is a great steppingstone to promote the **“Vocal for Local”** drive and to provide necessary products to deal with the current pandemic scenario.

An oxygen concentrator is a device that concentrates the oxygen from a gas supply (typically ambient air) by selectively removing nitrogen to supply an oxygen-enriched product gas stream for use by people requiring medical oxygen due to low oxygen levels in their blood. It is a portable and cost-effective device widely used in hospitals. One of the major issues that COVID-19 patients start facing is the inability to breathe properly. Therefore, oxygen concentrators can be helpful in providing best possible oxygen supportive care. Some other benefits of Oxygen Concentrators include improved physical exercise tolerance, improved quality of sleep, and enhanced mental alertness.
